

UNIFIED FIRE AUTHORITY

MEMORANDUM

24-169

November 27, 2024

TO: All Personnel

FROM: IT Manager Bowden

SUBJECT: P25 Migration Update

Details:

SLC will begin their migration at 0800 on Monday 12/2 and will be completed on Wednesday 12/4. The migration rack for SLC will be placed and confirmed operational prior to the cutover beginning. Once the cutover begins for SLC the migration plan will be in effect.

Summary:

System: P25 Status Update

Change #: NA

Change Start Time: December 2, 2024, 8:00 am

Change End Time: December 13, 2024, 8:00 am

- Monday, December 2, 2024, 8:00 am - SLC will begin migrating
- Wednesday, December 4, 2024, 11:59 pm – SLC will complete their migration
- Thursday, December 5, 2024, 8:00 am - VECC will begin their migration
- Thursday, December 12, 2024, 11:59 pm – VECC will complete their migration

Services impacted:

Any mutual aid with SLC fire and Sandy fire will operate on the legacy VC-fire-2 starting Monday once the migration patch has been confirmed and the cutover begins. All additional working alarms will omit Sandy and SLC fire apparatus until the cutover is complete for both dispatch centers.

Medical calls that Sandy is handling for a VECC agency may need to be moved to a SLC dispatcher if there is a working fire already active on fire channel 2. The dispatchers will make this call. The dispatch centers will provide channel assignments on dispatch.

If the mutual aid is a VECC agency responding into a SLC or Sandy area, the VECC agency will need to switch to the P25 channel. The migration plan will be only utilized when Sandy or SLC is responding into a VECC jurisdiction.

Fire channel 1, fire channel 2, fire channel 3, and fire channel 5 will all be operational channels during the cutover. Channel 1 will not be utilized for USDD, this will not affect the tones and Samantha voice that transmits through the fire stations and belt pagers.

- Comms Chief will be utilized during cutover
- VECC fire 4 will not be utilized until the cutover is complete
