

UNIFIED FIRE AUTHORITY

MEMORANDUM

25-037

March 5, 2025

TO: All Personnel

FROM: Chief Burchett

SUBJECT: Riverton Stations Staffing

Riverton City Council Member Tish Buroker brought to my attention the Council's desire to discuss a move from four to three-handed staffing in the Riverton stations. AC Dern, Local 1696, and I attended the Riverton City Council work session on Monday, March 4, 2025, to educate the Council on what this looks like and the potential impacts to service.

The Council is currently in the information gathering phase and has not made a decision as of yet. Together with Local 1696, we have been working with the councilmembers so that they may make the best decision for their community. It is possible that they will vote on a final staffing model at the March 18, 2025 Riverton City Council meeting.

We will continue to work with them to ensure they have all the information necessary while they consider this important potential change. I assure you, and the Council has stressed, this is not a decision based on the quality of service delivery, but solely a financial consideration for the City.
