

UNIFIED FIRE AUTHORITY

MEMORANDUM

25-169

September 24, 2025

TO: All Personnel

FROM: HR Deputy Director Ricotta

SUBJECT: Special Operations Vacancies (Hazardous Materials Program) Engineer

There is a vacant Engineer position in the Hazardous Materials Program at Station 126C. In accordance with the Professional Development Plan, interested Engineer Specialists will be required to:

- Submit a resume/work history and cover letter for consideration
- Candidates may go through an interview process with internal evaluators

The preferred candidate will be certified as a Utah State Hazardous Materials Technician. This certification is not required but is preferred. If the selected Engineer Specialist does not have this certification, he/she will be expected to obtain certification within one year as soon as a qualified course is offered.

If you are a promoted Engineer Specialist and are interested in being considered for this position, please submit your interest through iSolved Talent Acquisition (formerly ApplicantPro) **prior to 5:00 pm on October 8, 2025**. Documents will be forwarded to Special Operations Captain Chad Green following the closing date. At that point, you will be provided with additional information regarding the process for selection.
