

UNIFIED FIRE AUTHORITY

MEMORANDUM

26-045

March 23, 2026

TO: Operations Personnel
FROM: Operations Chief Kay
SUBJECT: Wildland Response Readiness

With our warmer and drier than normal winter and early spring, the wildland season is upon us with great potential for early-season fires.

Now is the time to ensure our wildland firefighting apparatus and PPE are functional and ready for the season.

- All Type VI apparatus have been placed into their stations, replacing the snowplows (except for 108)
- Please ensure all Type VI engines and water tenders are equipped, full of water, and ready to respond.
- Double-check that your wildland PPE is operational and with you on your apparatus.
- Ensure BK radios are functioning and outfitted with fresh batteries

Order any needed equipment, supplies, and PPE from Logistics.

Annual Wildland refresher training is on the station calendars, and the pack test/wildland LMS assignments are coming soon.
